Write a brief summary of your relevant experience and expertise, career highlights, suitability for the position. Tailor your statement to match the specific requirements of the role.

EDUCATION

Data Science, York St John University, London, UK.

September 2025– September 2026

Relevant Modules:

Final/Predicted Grade: M.Sc. Data science

Food Science and Technology, Kogi-state University, Kogi, Nigeria.

January 2012 – March 2018

Relevant Modules:

Final/Predicted Grade: Degree awarded.

PROFESSIONAL EXPERIENCE

SmartShifts Agency, London, UK

October 2025 – Present

Support Worker

- Supported the day-to-day care of 10+ young people across multiple residential settings by implementing person-centred care plans, behavioral support strategies and safeguarding procedures, maintaining 100% compliance with Ofsted standards and organizational policies.
- Produced 100+ incident reports, daily logs, key-working records and safeguarding documentation using electronic recording systems to document care delivery and behavioral observations, improving record accuracy and supporting informed multidisciplinary decision-making.
- Analyzed behavioral patterns, safeguarding concerns and risk indicators by monitoring daily observations and reviewing incident trends, contributing to proactive intervention strategies, and reducing repeat behavioral incidents.
- Collaborated with 15+ multidisciplinary professionals, including social workers, therapists, education providers and healthcare teams, to coordinate care plans and review young people's progress, improving communication and continuity of care.
- Managed medication administration, welfare checks and risk assessments by following organizational policies and regulatory guidelines, maintaining 100% compliance with medication and safeguarding procedures.
- Supported young people through emotional dysregulation using trauma-informed practice, therapeutic communication and de-escalation techniques, reducing the need for restrictive interventions, and improving emotional regulation outcomes.

Highlights: Successfully supported 10+ young people across multiple residential homes while maintaining 100% safeguarding and documentation compliance, producing 300+ professional reports, strengthening multidisciplinary collaboration, and contributing to improved behavioral outcomes through evidence-based care planning.

NewAge Mobile Concepts Limited, Lagos, Nigeria

September 2022– September 2025

Business Process & Data Analyst

- Established the organization's first Information Technology (IT) department by developing the technology strategy, defining operational processes and recruiting technical resources, reducing IT support response times by 60% and driving organization-wide digital transformation.
- Led the migration of Sales, Human Resources, Finance and Inventory from manual paper-based processes to a cloud-based Oracle NetSuite ERP platform by gathering business requirements, redesigning workflows and overseeing data migration, reducing manual data processing by 85%, improving data accuracy by 95% and increasing operational efficiency by 40%.
- Managed the end-to-end implementation of Oracle NetSuite ERP for 30+ employees by configuring workflows, coordinating stakeholders and delivering user training, achieving 100% user adoption across all key departments.

- Designed and standardized 20+ automated digital workflows using ERP and cloud technologies to eliminate manual approval processes, reducing document processing time by 70% and increasing departmental productivity by 35%.
- Conducted business process analysis across 4 core business departments by mapping workflows, analyzing bottlenecks and engaging department managers, reducing operational costs by 15% while improving service delivery by 30%.
- Developed 40+ executive dashboards, KPI reports and operational performance reports using ERP data, Excel and Power BI, reducing report preparation time by 75% and enabling faster strategic decision-making.
- Led ERP implementation training for 30+ employees by developing user guides and facilitating workshops, achieving 100% successful system adoption and reducing post-implementation support requests by 65%.
- Performed data cleansing, validation and migration of 50,000+ historical business records into Oracle NetSuite using structured quality assurance processes, achieving 98% data integrity and improving reporting reliability.

Highlights: Successfully established the organization's first IT department, led the digital transformation of four core business departments (Sales, HR, Finance and Inventory), implemented a cloud-based Oracle NetSuite ERP solution, reducing manual processes by 85%, improving data accuracy by 95%, reducing report preparation time by 75%, increasing operational efficiency by 40%, and achieving 100% ERP adoption across key business functions.

Techstarters Africa, Lagos, Nigeria

January 2023– December 2023 Program

Director & Business Manager

- Directed technology education program for 150+ learners by coordinating training schedules, managing instructors and overseeing program delivery, achieving a 95% program completion rate and improving learner satisfaction.
- Managed relationships with 10+ corporate partners, trainers and stakeholders by coordinating meetings, negotiating partnerships and monitoring program objectives, increasing strategic collaborations by 40%.
- Led a multidisciplinary team of 15+ instructors, mentors and administrative staff through structured project management and performance monitoring, improving program delivery efficiency by 35%.
- Developed program dashboards and operational reports using Excel and reporting tools to monitor KPIs, learner engagement and operational performance, reducing manual reporting time by 60%.
- Planned and delivered 50+ technology and cybersecurity workshops by coordinating trainers, learning resources and operational logistics, increasing learner participation by 45%.
- Introduced digital reporting processes and standardized operational documentation, reducing administrative workload by 40% and improving reporting accuracy by 90%.
- Mentored aspiring Cyber Security Analysts through structured technical coaching and career guidance, supporting learners in obtaining professional certifications and employment opportunities.

Highlights: Successfully managed technology programmes supporting 150+ learners, increased strategic partnerships by 40%, improved programme delivery efficiency by 35%, reduced manual reporting by 60%, and increased learner participation by 45% while mentoring future Cyber Security professionals.

The One Spirit Company Limited, Lagos, Nigeria, Lagos, Nigeria

April 2022 – September 2023

Business Coordinator

- Analyzed operational workflows across 5+ business functions by engaging stakeholders, reviewing business processes and identifying operational bottlenecks, reducing operational costs by 15% and improving service delivery by 30%.
- Prepared 100+ business reports, dashboards and operational performance summaries using Excel and reporting tools, improving reporting efficiency by 60% and supporting executive decision-making.
- Collaborated with developers, business leaders and operational stakeholders to gather requirements and implement process improvements, increasing project delivery efficiency by 35%.
- Managed multiple operational improvement projects simultaneously by coordinating resources, timelines and stakeholder communication, achieving a 95% on-time project delivery rate.
- Developed operational policies, procedures and workflow documentation, improving compliance by 40% and reducing process inconsistencies across departments.
- Analyzed financial and operational data to identify business improvement opportunities, supporting strategic initiatives that increased operational performance by 25%.

Highlights: Successfully coordinated 500+ executive engagements, prepared 250+ executive reports and board papers, improved executive scheduling efficiency by 70%, reduced stakeholder response times by 50%, and enhanced document management efficiency by 80% while supporting executive-level strategic decision-making.

PROJECTS & EXTRACURRICULAR

MSc Data Science Capstone Project – York St John University, London, UK

September 2025 – Present

Project Aim: To develop a cloud-based business intelligence solution capable of processing large datasets and generating actionable insights using Azure and modern data analytics tools.

Your Role on Project: Lead Data Analyst and Researchers.

- Designed and implemented an end-to-end data analytics pipeline using Microsoft Azure, Python, SQL and Power BI.
- Performed data extraction, cleaning, transformation and analysis on datasets containing over 1.9 million records.
- Developed interactive dashboards and data visualizations to communicate key business insights and performance metrics.
- Applied statistical analysis and machine learning techniques to identify trends and support data-driven decision-making.
- Produced technical documentation and research reports in line with academic and industry best practices.

Achievements/Outcome:

- Successfully designed a scalable cloud-based analytics solution following the Medallion Architecture (Bronze, Silver and Gold).
- Improved data processing efficiency through automated ETL workflows.
- Produced executive dashboards that transformed complex datasets into meaningful business insights.

VOLUNTARY WORK

TechStarters Africa, Lagos, Nigeria

July 2023 – December 2023

TechStarters Africa is a technology education organization focused on equipping young professionals with practical digital and cybersecurity skills through training, mentorship and career development programmes.

Role

Program Mentor & Career Coach

Mentored aspiring technology professionals on career development, CV writing and interview preparation.

Supported learners with cybersecurity and data analytics training.

Assisted programme participants with employability skills and professional development.

Collaborated with instructors to improve learner engagement and programme delivery.
